DEVELOPMENT OF PRACTICAL NURSING IN HAWAII 1947 - 1967
PRACTICAL NURSING SCHOOL IS OPENED

The doors of Honolulu’s first school of practical nursing were thrown open on October 20, to admit the first class of 24 students selected from over 100 applicants to begin the rigid 10 months course of instruction.

Scheduling at Mrs. Marjorie Elliott, R.N., director of the new school, three classes will be held the first year. The second class is due to get underway on January 5, five weeks after the first class started; while the third class is scheduled to begin their training on March 5.

Each class will be given nine weeks of theoretical training and then will proceed to the operating rooms of various Honolulu hospitals, in the field with public health nurses and in various schools.

Subjects being given include simple nursing procedure, home compostion, personal hygiene, ethics and personal relationships, child care and development, continuity, help accidents and crises, and the study of the social conditions under which the common diseases occur.

Ten members of the first class are from the outer islands while two are residents of Oahu and the remainder from Honolulu. Mrs. Elliott noted that the school is not essentially an island school but that students from each class will be given an opportunity to visit the others in Honolulu. Mrs. Elliott feels that it is a real service to the island students in that they will be given a chance to study in the city and in home care of patients.

The school which is being held at Washington Irving school is operating in cooperation with the Department of Public Instruction for the training of Nurses. Licensing of practical nurses is compulsory in the territory under the Nurse Practice Act of 1935.

Organizations instrumental in starting the school were the Department of Public Instruction and the Community Nursing Service, with Elliott Direct School Director.

The director of the school for practical nurses is Mrs. Marjorie Elliott, R.N., a graduate of Johns Hopkins hospital school of nursing of several years’ experience as a nurse on the staff of New York Hospital. Mrs. Elliott opened in Honolulu in 1914 and was on the staff of Queen’s hospital as assistant superintendent in 1921.

Assisting Mrs. Elliott is Mrs. Myrtle Schaftenburg, R.N., a graduate of the University of Michigan school of nursing. Mrs. Schaftenburg was formerly associated with the Hospital Group in Honolulu.

The third member of the school’s staff is Mary Mars, who is handling the course in home economics, Miss Mars had formerly taught courses at the school of nursing in Kauai and at the University of Hawaii.

Mrs. Elliott said the specified uniforms will soon be available to students in Jasmine — a new practical pattern in the territory.

First School of Practical Nursing Will Give Tea to Those Who Aided

Will been invited to a tea to be held and the home management apartment in is Mrs. Marjorie Elliott. Coordinating Washington make punch for the tea as part of:

Almo almost a hundred civic leaders Gardner Black Miss Charlotte Kerr others

Elementary School of practical nurses receives a check for is an acute shortage of trained attendants to care for the sick in teaching of practical nursing was established through the joint cooperation of practical nurses was established through the joint cooperation of the advisory council and the student members of the school. The check was received from the public health funds, apart from the charges.

Mrs. Margaret Comer, Member of first class at school at tea.

Mrs. Frances Janda, Director at Saint Francis Hospital, accepts the guest book.

HOLIDAY HOSPITALITY ON A BUDGET includes student-made Christmas cookies, Milkless fruit cake, and a simple punch with club juice, ginger ale and orange juice. Bread was made by school of practical nursing and served on paper plates covered with decorative margarine. Mrs. Myrtle Elliott, Director in home management, and Mr. Woodrow put together the entire tea.

LOW TEMPERATURES FOR BAKING COOKIES produce delicious results according to Mary Sales riggins, caretaker in home economics at Honolulu's first school of practical nursing. Here she and Lorene for one of the cookies for the school's recent tea party. The cookie recipe is on this page—below Bulletin photo.

Austerity Pleases When Party Cookies Ave Made This Way

By CAROLYN CUSHINE

They don't come in a tin but will make a fine addition to the table. And what do you serve to guests attending a tea? Here is a recipe for one of them:

CORN FLAKES KISSES

INGREDIENTS

1 cup cornflakes
3/4 cup milk
2 tablespoons brown sugar
1/2 teaspoon ground nutmeg
1/2 teaspoon ground cinnamon
3/4 cup heavy cream
1/4 teaspoon vanilla

DIRECTIONS

1. Place plain cooked dough was produced delicious results according to Mary Sales riggins, caretaker in home economics at Honolulu's first school of practical nursing. Here she and Lorene put together the entire tea.

Mrs. Marjorie Elliott, R.N., director at Saint Francis Hospital, accepts the guest book.

NEED FOR PRACTICAL NURSES

Without any other professional preparation, practical nurses are often needed when a hospital is short of registered nurses. Practical nurses are needed in every community for the care of patients. They are needed in the homes of the sick and the aged, in boarding houses, in sanitariums, and for all types of nursing care. Practical nurses are needed in every community for the care of patients. They are needed in the homes of the sick and the aged, in boarding houses, in sanitariums, and for all types of nursing care.

Many practical nurses are needed in hospitals, particularly in the large teaching hospitals. Practical nurses are needed in hospitals, particularly in the large teaching hospitals. Practical nurses are needed in hospitals, particularly in the large teaching hospitals.

For lack of practical nurses, many elderly people and their families are not receiving the care they need. Practical nurses are needed in every community for the care of patients. DEVELOPMENT OF THE SCHOOL OF PRACTICAL NURSING

Objectives: Members of the Health Care Committee will present a resolution at the August 24th meeting, recommending the School for the training of practical nurses and asking the Health Council to lend its support to the project. This Council, in turn, will recommend such plans and supporting the committee to submit their plans and proposals to the Board of Education for approval. Since the Practical Nurse School has been approved and the Practical Nurse Program has been established, the next step is to open the School. At this point, the implementation of the new program can begin.

The first school of practical nursing in the territory was established on October 29, 1967, with 14 students. Since then, the program has been under the supervision of the Practical Nurse Division of the Department of Public Instruction. The school has been very successful, and the 1974-75 school year has seen the enrollment of 17 students. The school is open to students who have completed their high school education and are interested in pursuing a career in the health care field. The program is designed to provide students with the knowledge and skills necessary to become effective practical nurses.

Practical Nurses at St. Louis Hospital are currently practicing in a variety of settings, including hospitals, clinics, and nursing homes. The program is designed to prepare students for a wide range of career opportunities in the health care field.

Home Nursing Care Provided By Students

The telephone rings in the office of the Practical Nurse Training School. "905215, Practical Nurse Training. "Yes, our students go into homes to give nursing care."

Your wife is just home from the hospital with a new baby and needs help.

Yes, we can assign one of our nurses to you. Our home nursing services will begin a student out to your home at 8:00 to stay until 11:30.

Yes, she will bathe and dress the baby, prepare bottle, prepare formula and do the baby's laundry. She will also be glad to help you with the housekeeping.

"Yes, it is not to be paid for her services. The experience is a valuable part of her training as a practical nurse."

Yes, you may pay her for fun. I am sure she will appreciate that. "You are welcome. Goodbye.

This type of telephone conversation is heard frequently in the office of the Practical Nurse Training Course, which was established by the Department of Public Instruction and is located in the Washington Intermediate School building.

Students are groups of six receive, on the home part of their training, three weeks experience in home nursing. During the first two weeks they spend approximately three hours and one half hours.

PRACTICAL NURSING

For all who have an aptitude for nursing as indicated by a sincere interest in people, the ability to get along well with others and a real desire to care for the sick, the field of Practical Nursing offers endless opportunities for a deeply satisfying career.

Knowing that there are well over one thousand practical nurses employed in the territory at the present time and that most of them have been "trained on the job" with no formal classes or background information, there can be little doubt that well trained practical nurses, both men and women will find ample opportunity for interesting employment in hospitals, homes, doctor's offices and industries.

The course in Practical Nursing was established in October of 1947 and is functioning under the Vocational Division of the Department of Public Instruction. The school is located in the Home Economics building of the Washington Intermediate School. Excellent teaching facilities including hospital equipment are housed in three large class rooms and a completely furnished practice apartment for use by the classes in Home Management.

Basic theoretical courses with the necessary practice fill the first period of eleven weeks. This instruction includes the study of the structure, functions and hygiene of the human body with an understanding of the common chronic diseases; personal behavior and relationships; infant and child care and development; nutrition and food preparation; nursing procedures and home management.

At the termination of this preparatory period students, in the school uniform, spend twenty-four weeks in local hospitals giving nursing care under the supervision of professional nurses to mother and new babies at Kapiolani Maternity Hospital; chronic and convalescent children at Shriner's Hospital; tuberculosis patients at Leahi Hospital and chronic and convalescent aged and indigent patients at Maluhia Home.

In addition each student spends three weeks giving nursing care in private homes, two weeks working with well children in Central Union Church Nursery School and one week in preparation of special diets in the dietary department of the St. Francis Hospital.

Three classes each year are accepted for the ten months course of training, entering the school in September, January and April.

The school uniform for girls is aqua inclan, trimmed in white. At graduation a cap and the school pin complete the graduate uniform.

Sinc e about one third of all employed practical nurses in the territory are men (usually called orderlies, attendants, or floor boys), it is only right that this opportunity for training should be extended to include boys.

The first class for "men only" will begin on April 11th and will be especially adapted to the particular types of nursing for which men are employed. By special arrangement, senior boys in good standing who apply and are accepted for the training, may drop out of their home school to enter and will receive both their high school and practical nursing diplomas at the conclusion of the course.

The selection of twenty-four students for each class is based on written application, personal interview, references, and nursing aptitude test. Girls or boys who are interested in a practical nursing career should telephone Mrs. Elliott at the school, 908215.
Qualified Practical Nurses Trained at Honolulu School

The pioneering spirit is well-nourished among nurses in Hawaii. This was amply demonstrated when 24 students from the Islands entered the practical nursing course under the division of vocational education of the department of public instruction. The course is conducted at the Honolulu School of Nursing.

The class is the second of three classes being launched to prepare practical nurses for the home management and nursing school diploma program. This vocational school is the main source of replacement in the Territory of Hawaii, as the university of Honolulu is the only source for the first two years of academic work.

The course is 42 weeks in length and includes 30 weeks of theoretical work in the school, 30 weeks of hospital affiliation, and one week of review in preparation for the examination for licensing given by the State Board of Nursing. Students receive no remuneration during the course. Cost to them is approximately $260.00 plus provisions for living expenses.

Applicants are required to write an application, personal interview, two or more years of references, and a nursing aptitude test. There are five men now taking the course in April.

The Territorial Practical Nurse School, which has been in existence for over 20 years, has trained nurses who are now employed in hospitals and institutions on the islands. Men and women are eligible to take the course, and the age limit is 18 to 50 years of age.

The Nursing School is under the direction of Mrs. Esther Stubblefield. These men are already employed in hospitals or institutions. More male practical nurses are needed. Here are some photos of the class.

Male Practical Nurses Needed

A recent survey of hospitals in the territory indicates that a considerable number of male practical nurses (male or female) will be needed in the near future to take care of replacement on hospital staffs and to expand the number of personnel as planned for by several hospitals.

The first class of 24 male students, as much as 80 percent of them, are already employed in hospitals. More male practical nurses are needed.

Nurses for the work are low, ranging from $500 to $750 per month. The average salary paid registered nurses is approximately $1000.

An experienced male nurse, capable of assuming more responsibility, is employed, it is hoped that the salary schedule will be adjusted to compete with hospitals where male practical nurses are now paid.

The Department of Public Instruction is interested in recruiting the all-male class by making it possible for senior high school students to gain sufficient training to qualify in the practical nursing course in April. At graduation from the latter course, they will also receive their high school diplomas.

Four classes of women students have already graduated from the Practical Nurse School, which has been in existence for over 20 years. These men are already employed in hospitals or institutions.

Students are also employed in local hospitals who have not had licensed training before, and at least in the evening school at present.

The Territorial Practical Nurse Association, which is composed of licensed nurses, is employing an experienced male nurse at a salary of $1000 per month in order to get a sufficient number of practical nurses. This is being offered in the average to promote already employed in practical nurses.

Some men and women now employed in local hospitals, who have some but limited training before, are enrolled in the evening school at present.

Diplomas Given

22 Girls as

Practical Nurses

Twenty-two practical nurses received diplomas Monday night before an audience of friends and relatives at the Mabel Smyth auditorium. Twenty-seven women completed the training under the auspices of the territorial department of public instruction, but five were unable to attend the graduation exercises. These 22 were given diplomas Monday night when they received their pins. Given by Myrna Campbell, president of the Nurses’ Association of Honolulu. The picture opposite shows the nurses being seated by Mrs. W. H. Coulter, acting superintendent. The nurses are hostesses at a brief reception. Diplomas were presented by Clarence Ferdun, director of the Girls’ Training School. The ceremonies were presided over by Myrtle Schattenburg, coordinating instructor of practical nurse training. The picture above is of practical nursing classes. The 22 graduates were welcomed by Myrtle Schattenburg. Following the address the nurses were introduced individually by Clarence Ferdun, director of the Girls’ Training School. Following the ceremonies, the nurses were given a brief reception in honor of the new graduates. They were introduced individually by Clarence Ferdun, director of the Girls’ Training School. Nursing Career Offers
Vocations To Boys, Girls
Tests Given On May 20

Nursing, long considered a woman's job, is now also a man's job with equal need for boys to take advantage of it.

Tests accepted for training for employment, fees and grants who are interested are required to take vocational nursing aptitude test which will be given on May 20 at 9:30 a.m. in McKinley high school cafeteria. There is no charge.

The training course of 43 weeks includes caring for cases of mild illness, chronic and aged patients, convalescent patients and newborn infants and mothers.

An acceptable score in the nursing aptitude test is a must in taking a vocational nursing aptitude test.

Evening Class Planned
For Practical Nurses

An evening class for practical nurses working in hospitals will begin in late spring or early summer. Mrs. Myron L. Elliott, director of the Practical Nursing Training School, has announced that the two-year evening course will make it possible for practical nurses who have not previously had formal training, to qualify for the Territorial Board exam.[n]

The school for practical nurses is located in building 76-A on the McKinley campus as a part of the Vocational School. All applicants must be least 18 years of age, the training course of 43 weeks is for boys and girls who are physically and mentally sound.

The training course of 43 weeks is held in the laboratory, classroom and training hospital work.

Nursing, long considered a woman's job, is now also a man's job. Boys are as equally suited to nursing as high school graduates.

TWENTY THREE STUDENTS GRADUATE FROM THE PRACTICAL NURSE TRAINING COURSE. This was the eighth group to complete a 10 month training period for practical nurses given by the vocational division of the department of public instruction. Among the students were two men, the first in the territory to complete this course. In the first row, left to right, are Yaeko Shibuya, Emiko Mori, Mabel Okamoto, Nora Abe, Eleanor Ige, Theresa Fujitani, Gertrude Dias and Ellen Kimoto. In the middle row, left to right, are Dolores Ulanday, Alice Kiyohiro, Isabelle Musselmann, Marian Miyashiro, Katherine Miguel, Lorraine Anthony and Ernestine Ikemoto. In the back row, left to right, are Pedro Lacambra, Leonora Bulusan, Kathleen Moses, Louise Silva, Auria de Lara, Jane Aihara and Ben Pitoy. — Craig Stevens studio photo.
Here are scenes at Honolulu's Convalescent Nursing Home at Maunalani Heights at the close of its first year of operations. At the top, left, is one of the large wings of the home-hospital, and at the right is one of the recreation rooms which provide rest and relaxation for the residents. At the bottom, left, are Tadashi Votta, diversional therapist, instructors in the art of hand-making leather. The order pictured above is a treatment room, and to the right are Eleanor Teves, staff nurse; Bertha Yoneoka, temperance officer; and Elizabeth Cabeo, admitting officer. At the right picture, left to right are Louise Kaneshiro and Doris Okumura, student nurses, and Florence Akutagawa, student nurse. "Partially renovated classroom in first building—McKean" and "1951".
Equipment and supplies salvaged from fire 9-51 stored in adjoining room in same building.

Mrs. Elliott at her desk in same room during classes. Raincoat needed because of rain coming thru' 'ruin on roof made by fire fighters.

13th Class studying in same dark room. No electricity available.

Showing one ceiling fan. Classes were held in this manner for several months.

Our wonderful 13th Class, after the fire, in Red Cross First Aid Class using the grounds as a classroom.
Practical NURSING

By MARY ANN WEST

T HE UNITED STATES Navy Training Center for Practical Nurses has set the stage for a new hospital here in the Kaimuki area. This is the only available space for the instruction and training of practical nurses. The center is the present home of the Practical Nursing School at the McKinley High School.

An incident to occur Mary West, one of the first nurses in the school, was recently appointed to the position of instructor. She has had many years of experience in the field. Her appointment was much anticipated by the students.

The Practical Nursing School is the only available space for the training of practical nurses. The center is the present home of the Practical Nursing School at the McKinley High School.

The school has been accredited by the American Nurses' Association and is conducted in cooperation with the University of Michigan. The instructors are graduates of the University of Michigan and are well prepared to teach the students.

The school offers a two-year course, including all practical courses and practical procedures. The practical courses include all aspects of nursing, including the care of patients in hospitals, homes, and other institutions. The students are also taught the theory of nursing.

The school has a large number of instructors, including nurses, physicians, and other medical professionals. The school is well-equipped with all the necessary equipment and supplies needed for the training of practical nurses.

Mrs. Marjorie Elliott, R.N.
Instructor in Charge
Practical Nurse Training
916 Punchbowl Street
Honolulu, Hawaii

My dear Mrs. Elliott:

At its regular meeting of May 22, 1952, the Board of Directors of the Chamber of Commerce of Honolulu unanimously voted to authorize an expenditure of $100 from the Public Health Fund to support the play being sponsored by your Practical Nurse Training School.

It is the hope of the Directors that this play will be very successful and will result in the health improvement you seek.

Continued best wishes to you and your association.

Yours very truly,

Frank R. Hicks
Executive Vice President

Dear Mrs. Elliott:

The play Wednesday evening was received with much enthusiasm. It meant a great deal to the people who came, not only because of the message that was portrayed so beautifully, but to many of the members it opened new possibilities for program.

Please convey our heartfelt appreciation to the many fine people, who brought this fine program to our community.

Sincerely yours,

I am so happy that I have come to the Practical Nursing School for it has taught me so many good and useful things—things with which I can help others less fortunate than I. Geriatrics means so much to me because my father had a cerebral hemorrhage a few years ago, and I know it is to have someone close just waste away in front of your eyes. I realize now that I should have been doing the things I know I now know. But then it is never too late. Maybe I don't have much time left for he shows symptoms of a person pretty far gone, but I pray God that I will have the chance to apply some of my knowledge gained to make his remaining days as comfortable and happy as possible. Help is short-handed at home so he doesn't get the attention he deserves, but how happy he would be if I could take his hands, smile and talk to him though he doesn't seem to understand, and massage his emaciated body soothingly as Miss Sorgt taught us. To clean his failing eyes of pus with boric acid, wash his mouth frequently with mouth wash for I noticed he had a difficult time in swallowing and always kept his saliva in his mouth—all this which I didn't understand at that time makes me know now that there was so much I could have done to help him.

Besides being a paraplegic, he has a failing heart so the doctor has restricted salt in his diet. I am sure that by using a salt substitute and other seasonings as we were taught in class, I can prepare food that he will enjoy. It means so much to a helpless elderly person to be made comfortable and happy—to be treated as an individual. He is beyond the stage where we can make him feel useful, but we can certainly make him feel wanted. His failing eyesight has sharpened his hearing and I know that he would really appreciate some of the old-fashioned songs on a phonograph. He has "lost his speech and so he is left alone most of the time, but I know his face would light up with happiness if someone would talk to him. He spends so much of his time just lying in one position, I think how painful it must become. Changing his position would help his aching body I know and would have prevented the terrible bed sore he has had for so long. I pray God I won't be too late. If it is His will that he must go before I finish school, I know that my learning has not been in vain for there are so many other elderly people that I would be able to comfort and give good nursing care. No matter where, in a home or in a hospital, elderly people really appreciate a nurse's kind words, gentle handling, and confident care.
Suza, anne watches Miss Ramos with interest as she administers an insulin injection. Before long the little girl will be able to perform this procedure herself.

In Hawaii as in any part of the world the practical nurse who brings interest and kindness to the patient is repaid by confidence and love.

When Dr. Jones asked that I care for Suzanne Kato, a six-year-old diabetic, I thought it would be a good idea to review the disease from my notes and textbook. I already knew that diabetes mellitus is a condition that develops when the pancreas fails to supply a sufficient amount of insulin to convert sugar into energy, and that the early symptoms of this condition are excessive thirst, excessive urination, irritability, hunger, loss of weight, fatigue, itching of the skin, tendency towards skin infections, aches and pains. A special diet prescribed by the doctor, good hygiene, and insulin make up the usual treatment. Diabetes is under control when the patient is at his proper weight, has little or no sugar in his urine, has a safe level of blood sugar, and has none of the aforementioned symptoms. His environment should be pleasant and those with whom he comes in contact should understand why it is important to treat the diabetic person as a normal individual. This will help him not to resent any treatment that is prescribed and not to think of himself as different from his relatives or friends.

The next morning I carefully folded my uniform into my handbag and was off to report for 7 o'clock duty at the Kato home. Suzanne's mother welcomed me with a smile. Mr. Kato, who was about to leave for work, assured me that I wouldn't have too much trouble taking care of Suzanne. I later found out that Mr. Kato was an electrician. Mrs. Kato took me upstairs to Suzanne's room where we found her still asleep. We gently closed the door. I asked Mrs. Kato if I could change into my uniform. She led me to her bedroom where I changed clothes while she attended to a few things downstairs. On my way back I noticed that Suzanne was no longer in her room. I found her in the kitchen with a doll in her arms, watching her mother pile the dishes in the sink. Mrs. Kato introduced me to Suzanne, and as I said "Hello!" I noticed that she had a very friendly smile. Mrs. Kato explained where some

A productive enterprise 3-3-55 Practical Nursing School on McKinley Grounds Little Known Is Far-reaching Object

By OWEN E. LONG
Associate Editor, The Advertiser

Educational project of far-reaching effect are sometimes carried on almost secretly without the community knowing it. The Practical Nursing School, conducted in the street and least desirable building on McKinley High grounds.

This school was established in 1937 through the full-aided efforts of the Health Association, the Department of Public Instruction, and the Territorial legislature. The Smith Committee of $8,000 was to meet the expenses of operation of the school. Since 1940 the cost of operation has been a part of the public school budget. Current expenses are estimated at $8,000, but to this would be added another $8,000, and the school would be self-supporting as an independent unit.

Both these projects are being realized. A total of 484 young women have been graduated. They have come from all walks of life in Hawaii, have all kinds of occupations, and their ages range from 16 to 13 and a semi-invalid husband. They have not yet begun work but have positions assured. This is an excellent record for any vocational training course.

These graduates are an exceedingly important factor in the work of the 12 hospitals where they are employed. One associate recently stated that his hospital found it easier to place these graduates on the job than to hire experienced nurses. By hiring these nurses, particularly for the warmth of their interest in the patients whom they serve. Registered nurses are pleased to have them as assistants.

In these three typical cases of these workers, Mrs. A, a graduate of High School, has planned a child nurse for a future hospital work. Her experience in the school has shown her the importance of having a nurse who has human qualities and human understanding, and she has been able to work with this type of nurse to make her a better nurse.

Mrs. B, a graduate of High School, has planned to become a Public Health Nurse. This dream crystallized when she failed to qualify for professional nurse training. Her vocational counselor explained that in practical nursing she would be able to work in the same field, and in such a way that she would be more limited. She has decided to become a Public Health Nurse, and has been working with the school as she is now in her second year.

Mr. C, a graduate of High School, has planned to become a Public Health Nurse. This dream crystallized when he was required to qualify for professional nurse training. His vocational counselor explained that in practical nursing he would be able to work in the same field, and in such a way that he would be more limited. He has decided to become a Public Health Nurse, and has been working with the school as an instructor in practical nursing. He is now in his second year.

Mr. C developed tuberculosis when he was in high school and was hospitalized for a year. While a patient in the hospital he developed a high degree of independence and demonstrated a strong interest in nursing. He has taken the courses offered in the school and has been employed at the hospital as a practical nurse in the operating room. He is now in his third year of practical nursing and has been employed at the hospital as a practical nurse in the operating room.

Add to these three cases until you have 428 graduates and you have the human side of the Practical Nursing School. Each year between 40 and 50 new nurses are graduated. Only a few of these nurses ever need to be replaced. This is due to the fact that they are given a complete picture of the contributions they are making to a vital community need.

Serving a term from the business world, this type of education is definitely "a productive association."
The Territory of Hawaii consists of a small group of islands nestled in the Pacific Ocean some 2,000 miles from San Francisco and 5,000 miles from the nearest major islands of the United States. The largest city, Honolulu, is situated. The units of the National Education Division of the United States government at the Kapiolani Technical School, in 1947, in Honolulu to train students from all the islands. A smaller number enter the larger city, Honolulu, is situated.

Three classes each year have been employed in hospitals on the various islands. A smaller number enter the mainland.

Following the second world war, the establishment of the Practical Nursing School was made under the National Education Division of the United States government at the Kapiolani Technical School.

The alumnae group now consists of 495 nurses, most of whom are graduates, trained, and licensed, at the realization that well-trained nurses would be invaluable in the fairly adequate supply of nurses on all levels, in comparison with the nurse shortage on the mainland.

Following the second world war, the training of practice nurses was made possible on all levels, in comparison with the nurse shortage on the mainland.

The period of the Islands has been marked by some fundamental changes in the racial composition of the islands. Although there are some fundamental differences, the students are far outnumbered by those of Hawaiian ancestry. These students are all definitely American, but their racial characteristics and customs greatly increase the interest and stimulation of class discussions and activities. Racial equality does not exist even here, but Hawaii probably

Mrs. Schattenburg, who wears her dark brown hair in a becoming French twist, enjoys swimming and putting your feet up and reading, and she still has her college degree in range management.

The former Ellen Smyth Pickens, her daughter, married here in 1943 she again returned to teaching, and has turned to nursing. After a few months in the hospital, she returned to teaching, and has turned to nursing.

When Mrs. Elliott and Mrs. Schattenburg worked together to organize the school, 11 years ago, the latter was an assistant instructor.

Mr. and Mrs. G e o r g e C o n t o n, with whom she taught Red Cross nursing and taught in the school, were both members of the University of California at Los Angeles, and she is a graduate of U.C.L.A.

"One of the most important things to do is to make you keep interested in your children's activities and know what they are doing," Mrs. Schattenburg said.

"I was very careful to get a job where I would not have to be a heavy worker. The medical group very kindly offered me a job and I worked there a couple of years."

"And I have volunteered many, many, many hours in the hospital, and I have been very happy."

"I am very happy that my children are doing well."

"And I am very happy that my husband is doing well."

"And I am very happy that my daughter is doing well."

"And I am very happy that my son is doing well."

"And I am very happy that my grandchildren are doing well."

"And I am very happy that my great grandchildren are doing well."

"And I am very happy that my great great grandchildren are doing well."

"And I am very happy that my great great great grandchildren are doing well."

"And I am very happy that my great great great great grandchildren are doing well."

"And I am very happy that my great great great great great grandchildren are doing well."

Hawaii's Mother Of 1956 Chosen

Mrs. Myra J. Schattenburg, 56, of Honolulu, who after her husband died raised her three children on her own and put them through college, yesterday was named Hawaii's Mother of 1956.

"They are wonderful children," said Mrs. Schattenburg at her office at the Department of Public Instruction. "I'm an aunt of the father's, and the wonderful thing is that I was the wife of Dr. O. Lee Schattenburg, who died in July, 1943, at the time of his death the three children, Ellen, Marion and George were 11, 10 and 9 years old respectively."

A TRAINED NURSE

Mrs. Schattenburg, originally named Mrs. Myra J. Watumuil, went to work as a nurse for the Seattle Group for a year before she married the Rev. Devereux Schattenburg with the Girl Scouts of America, and she went back to the Seattle Group for another year. For the past nine years she has served as secretary of the local chapter of the Girl Scouting Service Corps and assistant director of the Girl Scout program in the Seattle area. Mrs. Schattenburg is interested in representing the interests of the city's girls on the committee of the national Girl Scout organization as well as on the Girl Scout program in the Seattle area. She is a member of the Girl Scout program and has been a member of the Girl Scout program for the past nine years.

THE VETERINARY MEDICINE

Mrs. Schattenburg, a graduate of the Veterinary Medical School of the University of California, was named the Mother of the Year by the Veterinary Medical Association of Hawaii.

Mrs. Schattenburg was named the Mother of the Year by the veterinary medical association of Hawaii in recognition of her service to the community and her contributions to the veterinary medical profession.

Mrs. Schattenburg is a member of the American Veterinary Medical Association and has been a member of the association for 10 years. She has been active in the association's activities and has served as a representative to the association's national meetings.

The Veterinary Medical Association of Hawaii is a nonprofit organization that promotes the health and well-being of the veterinary medical profession and its members.

Children of Mother of Year Are Headed Toward Success

The children of Hawaii's Mother of the Year, Mrs. Myra J. Schattenburg, are already gaining in the direction of success, through the foundation she laid in their youth.

A trained nurse, Mrs. Schattenburg, has graduated from the University of California at Los Angeles, where she received her Bachelor of Science degree in nursing. She has been active in the American Nurses Association for the past 10 years and has served as a member of the association's board of directors.

Mrs. Schattenburg, who was born in Honolulu, has been active in the community and has served on various committees and boards.

The three children, Ellen, Marion and George, are already pointing in an active part in church and community events and church and community activities and church and community activities and church and community activities. The children were married in Honolulu in 1955.

The Kapiolani Technical School opens in the new building on McKinley Boulevard and Pensacola Street. The first unit, to cost about $1 million, will begin classes on Jan. 1620, with the first practical nurses graduating in May.

Training for Practical Nurses

One of the first training courses offered by the Kapiolani Technical School is for practical nurses. The course (CLF) leads to a diploma in practical nursing. The course includes theoretical work at the school followed by six months of practical experience in hospitals here and in Elgin.

18 Win Practical Nursing Diplomas

Practical nursing diplomas were awarded to 18 students yesterday at ceremonies held in the Kapolei Technical School auditorium at 620 Pensacola Street. Representative Anna Kahakuloa was guest speaker.

The graduates—16 women and two men—have completed the one-year course in nursing at the technical school.

Clayton J. Chamberlin, Department of Public Instruction superintendent, presented the diplomas.

The two men graduates were Ester Evangelista and Modesta Darang, both of the Big Island.

Other graduates were:
- Mrs. Bluma Aaga, Mrs. Ernestine Barcenas, Delores Colodien, Reba Kua, Corisande Silva, Allen Tao, Sophie Traver, and Dorothy Tumans, all of Oahu.
- Yvonne Airia, Yatsugi Airia, Priscilla Douglass, Josephine Galasso, Callista Imamura, Alice Nakamura, Rikishi Takara, and Dorothy Villate, all of Oahu.

The Kapolei Technical School invites you to attend the Graduation Exercises of the Practical Nursing Department Friday evening, December thirtieth Nineteen Hundred and Fifty-seven at seven-thirty o'clock.

PRACTICAL NURSING IN HAWAII

By Myrila L. Schattenberg, R.N.

The Practical Nursing Department of the Kapiolani Technical School, under the direction of Mr. David Lyon, principal, and Mr. Albert J. Feirer, Director of Trade and Industrial Education, is the only educational institution in the Territory of Hawaii approved to train practical nurses.

The aims and objectives of this program are to prepare selected men and women for a career in practical nursing through the development of basic nursing knowledge and skills which will enable them to give effective care to the sick and to promote positive health and well-being. To provide sound instruction for the student so that the student may achieve a solid foundation in the principles of practical nursing, develop the necessary skills to perform the functions of a practical nurse safely and effectively and apply these principles to practice safely and effectively and apply these principles to practice in a hospital, home or community environment; to create and maintain a cooperative member of the health team, and to function as a cooperative member of the health team, the hospital, and the community.

In 1947 a group of educators met to plan for additional vocational training in the Territory of Hawaii.

There was a need for trained practical nurses, and since the Vocational Division of the Department of Public Instruction recognized the field as being one that would attract students, it was willing to establish a school. Minimum standards were set up by a committee of professional nurses. The guide for establishing practical nursing programs, published by the Office of Education in the Department of Health, Education and Welfare, was used in the development of the course. The Honolulu Chamber of Commerce generously provided funds for equipment.

The opening day in October of 1947 saw the first full-time and one part-time instructors greeting the first class of 32 students. Each year three groups of men and women were selected from all the neighboring islands, and ranging in age from 18 to 50, have been enrolled. The smallest group enrolled this term comprised 10 students. For the September group, 36 students, has been accepted. Two men in this class who bring our enrollment to a total of 50.

Petite Nursing Student
Now Feels Like Goliath

Frances takes blood pressure of "patient," fellow student Elsie Arakaki.

Frances takes blood pressure of "patient," fellow student Elsie Arakaki.

Frances Foster, a petite redhead from Hilo, will fulfill a lifelong dream March 18 when she graduates from the practical nursing department of Kaipio School.

"As far back as I can remember, I've always wanted to be a nurse," says Frances Foster. Stricken with polio 17 years ago, Frances, now 20, thinks that three operations as a child may have been responsible for her nursing ambition.

Her right leg was affected by polio, and doctors operated on her left leg to keep it from growing longer than the stricken one.

The result is that today, Frances is exactly the same height she was at the age of 10—four feet, 11 and three-fourth inches," she smiles.

But her game leg hasn't kept her from working just as hard as her classmates in the practical nursing course.

After four months of classroom work, the students combine study and actual nursing experience. Their training includes medical and surgical nursing, pediatrics, obstetrics, psychiatric, and home nursing assignments.

The school has graduated about 650 students since it was founded in 1947, says Mrs. Marjorie Elliott, chairman of the practical nursing department of the DPI's Kapiolani Technical School.

When Frances graduates, she'd like to work at Maluhia. "I enjoy geriatric nursing," she explains. "If you can bring a smile to an old person, it makes everything worthwhile."

She plans a two-week vacation between graduation and work, however. "I'm being married the day after graduation (to Airman Second Class William Campbell)," Frances explained, "and we'd like time for a honeymoon."

Students of practical nursing test their skills under supervision.

The practical nursing course at Kapiolani Technical School is open to men and women 18 to 50 years. It prepares students for interesting, challenging careers as licensed practical nurses.

Practical nurse employment gives many and varied satisfactions to the nurse as well as providing an adequate income. The need for well-prepared practical nurses far exceeds the supply in Hawaii as well as on the Mainland.

Many more practical nurses are needed both in private and civil service hospitals. Opportunities for employment also are open in private duty doctors' offices, industrial nursing and with the Department of Health.

Students begin their preparation for this career with 16 weeks of formal classes and nursing practice at the new building on the Kapiolani Technical School campus, 620 Pensacola St. The course continues with 32 weeks of actual supervised hospital experience plus related classes. The approximate cost of the one year training is $100 including uniforms.

After completing the course, students are eligible for licensing by the State Board of Nursing. Applications and applications are welcomed from high school seniors as well as older men and women throughout the state. For additional information or to make appointment for application and interview, call 52-349 or 503-518 on week days between 7:15 a.m. and 4 p.m.
Miss June Miura R.N., Clinical Supervisor, demonstrates the Blood Pressure machine to trainees Miss Pearl Akano, Mrs. Nancy Tuhi and Mrs. Alice Agena.

**NURSES’ TRAINING PROGRAM**

Who are the three girls pictured above in bright green caps and uniforms? — They are a part of the class participants in our first practical nurses’ training program which began on December 18, 1961, in cooperation with Kapiolani Technical School, Department of Education, our hospital is providing educational facilities for student practical nursing experience. Several other local hospitals are active in offering nurses’ training.

What previous training program requirements have these students completed — Completion of 16 weeks of pre-clinical study at Kapiolani Technical School.

And now? — Under the clinical supervision of our Miss June Miura, R.N. (pictured above), they have commenced their classes in medical-surgical nursing, to be followed by classes in obstetrical and pediatrics nursing. Classes in related nursing areas are also given during this 22 weeks training program.

And then? — These students will be rotated to another institution for other areas of nursing experience for completion of their year’s course which is fully accredited by Hawaii Board of Nursing. After satisfactory completion of the course, the graduate students will then be eligible to take the examination for license as a practical nurse.

We are proud to have our hospital participate in student training and anticipate having three such programs annually.
Kapiolani Offers Variety Of Technical Courses

Kapiolani Technical School, a project of the State Department of Education, is now accepting applications for September classes. The only fee for expendable supplies. Students also take courses in the business education department. Both one and two-year courses are offered. The school prepares students for dental assistants and practical nurses.

There is no tuition charge, since the school is part of the State's public school system. The only charge to students is a small fee for expendable supplies. Classes start Sept. 5 in the business education department. Both one and two-year courses are offered. The school prepares students for dental assistants and practical nurses.

The hotel-restaurant department includes programs in commercial cooking, part-time, management, housekeeping, and dietary services. Classes begin Sept. 5 in the hotel-restaurant department. Students get practical experience through affiliation with Queen's Hospital and the Honolulu County Dental Assistants Association. The program is endorsed by the Honolulu County Dental Assistants Association. The school prepares students for dental assistants and practical nurses.

Practic al Nurses Are in Demand
Graduates of the Practical Nursing Department of the Kapiolani Technical School are all employed soon after graduation. Even more practical nurses than are now being trained could be readily absorbed by the community.

The curriculum is well balanced with theoretical classes in the school and clinical experiences in five local hospitals—Kaiser, Leahi, St. Francis, Queen's and the State Psychiatric Hospital in Kaneohe.

Students, both men and women, range in age from 15 to 60 years. Three under 25 must be high school graduates and all must meet the required standard in scholarship, personality, and health.

Beginning salaries for graduates of the one-year program which admit 40 students in September and the same number in March class.

A Community Service for Girls in Green

Sponsoring community service activities in education, research and charitable care is one important activity of all Kaiser Foundation Hospitals, including your Honolulu facility.

One educational activity of Kaiser Foundation Hospital in Honolulu is helping young women prepare for careers as licensed practical nurses. You see signs of this activity whenever you glimpse a girl in a bright green cap and uniform, helping to care for patients. These green-clad young women are students from the Practical Nursing Department of Kapiolani Technical High School. In the past two years, 44 of them have come to Kaiser Foundation Hospital for experience in caring for medical, surgical, maternity and pediatric patients. All 44 have gone on to take their State examination and become licensed practical nurses. Recently eight more arrived to begin seven months of training.

Kaiser Foundation Hospital was one of three local hospitals enrolling this community service program in December, 1961, when the first students arrived after three months of classroom study at Kapiolani High. Each of the three hospitals then also provided a clinical instructor. In September, 1962, student interest in the program was so great that the Department of Education revised its curriculum and hired two full-time instructors, who rotate among the three participating hospitals.

The students' training program is demanding. The young women in green gradually increase their hospital experience from two hours a day to eight, including classes. Later they affiliate at other local agencies and institutions for practical experience in pre-school, psychiatric and rehabilitation nursing.

Comments from hospital patients make one fact clear: in gaining their practical experience, the students give more than they get.

"Those youngsters help brighten my day," said one elderly woman recovering from surgery. "They're so perky and eager to help you."

"I don't mind a bit, being their live material for learning," said a man whose illness first made him dependent on his nurses for many small favors. "They learn real quick. Of course," he winked, "someone with experience is always close at hand."

And adds Mrs. Wilma Amalu, the hospital's Director of Nursing: "We're proud to have provided clinical experience for 44 students in the past two years. And we're pleased to have had several graduates join our staff."

This is one way in which Kaiser Foundation Hospital tries to meet a community obligation to help strengthen general health and well-being.

Other Community Service activities here in Kaiser Foundation Hospital include charitable hospital care, and a clinical research program which enables any doctor on the hospital staff to apply for funds to finance a medical research project.
Admission Tests Set For Course in Nursing

Application for entry into a nine-month course in practical nursing of the Kapiolani Technical School must be postmarked by May 15. Those at least 18 years of age are eligible to take the entrance examination given by the school on May 16th.

Applicants must have completed at least two years of high school and have passed high school entrance examinations. Preference will be given to those who have completed college or have been employed in the field of practical nursing.

The course includes 1500 hours of practical experience, 125 hours of instruction in practical nursing, and 125 hours of clinical experience in hospitals, clinics, and schools.

Applicants must present proof of high school graduation to be eligible for the entrance examination. Preference will be given to those with a high school diploma or equivalent.

Applications should be submitted to the Kapiolani Technical School at 620 Pensacola Street, Honolulu, Hawaii 96814. Admissions information can be obtained by calling 568-2525.

The largest class in the history of the school is being graduated in August, 1965. Students who have completed the course will be eligible to take the state licensing examination.

For full article "Click Here"
What is the one-year course in practical nursing? "No change is made for tuition, but students are asked to pay for books, uniforms, laboratory, and graduation, which amounts to about $100. The salaries are set at starting employment in a good home in exchange for room and board and a small salary, if this arrangement is desired." Are there many job opportunities for those who wish to serve others as practical nurses? "Yes. Both here in Hawaii and elsewhere there is an increasing shortage of qualified persons to care for the sick. Positions are open to licensed practical nurses in hospitals, physicians' offices, convalescent homes, private homes, and private teaching agencies. I would say that 95% of our graduates go right into hospitals. We prefer this, because we believe that the broad experience a hospital gives is a worthwhile supplement to the training given in the fundamental course."

What are the working hours for a practical nurse? "Most nurses work a regular eight-hour day or whatever time specified by the hospital which employs them."

What are the working hours for a practical nurse? "Most nurses work a regular eight-hour day or whatever time specified by the hospital which employs them."

Are practical nurses well paid? "I think the best advice I could give would be: 1) do all you can to improve your reading; 2) develop a cheerful, unselfish outlook and an attractive personality, and 3) try to get in direct contact with any phase of nursing possible—perhaps as a Junior Volunteer Aide-in order to decide for yourself if you really want to work with sick people. I know many young people who were at one time discouraged or bored about trying about type of work who are happy in it now. It is a respectable, rewarding position. This may be the case."

Are practical nurses well paid? "I think the best advice I could give would be: 1) do all you can to improve your reading; 2) develop a cheerful, unselfish outlook and an attractive personality, and 3) try to get in direct contact with any phase of nursing possible—perhaps as a Junior Volunteer Aide-in order to decide for yourself if you really want to work with sick people. I know many young people who were at one time discouraged or bored about trying about type of work who are happy in it now. It is a respectable, rewarding position. This may be the case."

What are the entrance requirements? "We require that our applicants be of good mental and physical health. They must pass a high school education if under 40 years of age; background examinations are made for older applicants. Age requirements are fixed at 18 to 35. Someone interested in this career . . . or even in acquiring the valuable experience this course offers . . . should fill out an application blank, request an interview with me, and take an entrance examination. Tests given in the entrance examinations are designed to determine the candidate's suitability for nursing. Reference letters are requested of each applicant so we will have evidence of her dependability."
"Nurses of the Year" Receive Trophies

Governor John A. Burns yesterday presented trophies to student nurses who were named Student Nurse of the Year by the Hawai'i League for Nursing last year. The nurses were honored for excellence in their careers as practical nurses. The contest was sponsored by the League of Nursing, Inc., in cooperation with the Hawaii State Department of Health. The nurses were selected by nursing instructors who considered nursing techniques, work, and leadership.

Winners included Mrs. John August A. Burns, who is the daughter of Mr. and Mrs. John A. Burns of Waipahu, Miss Gayllyne Santos, who is the daughter of Mr. and Mrs. John A. Burns of Honolulu, Miss Karen Nagahisa, who is the daughter of Mr. and Mrs. John A. Burns of Hilo, Miss Dyanne Delmendo, who is the daughter of Mr. and Mrs. John A. Burns of Waipahu, and Miss Lucile Smidy, who is the daughter of Mr. and Mrs. John A. Burns of Honolulu.

The nurses were presented with their trophies by Governor John A. Burns yesterday at the Palace of Versailles in Honolulu. The nurses were honored for their outstanding contributions to the field of nursing in Hawaii. The nurses were selected by nursing instructors who considered nursing techniques, work, and leadership.

Nursing School Opens In March

By ROBYN RUCKARD

You've been looking for that something special in your life, something that will make you feel good about yourself and your future. You've considered going to college, but you're not sure what you want to do. You've thought about becoming a nurse, but you're not sure if you have what it takes.

Well, look no further. The Kapiolani Technical School offers a one-year program in practical nursing that will give you the skills you need to become a registered nurse. The program is designed to prepare you for a career in nursing and for entry into the nursing profession.

The curriculum includes classroom instruction, laboratory work, and clinical experience. You will learn about basic medical terminology, anatomy and physiology, pharmacology, and nursing theory. You will also have the opportunity to work with patients in a simulated hospital setting.

The program begins in March, and applications are now being accepted. For more information, please contact Mrs. Marjorie Elliott, coordinator for the Department of Practical Nursing, Kapiolani Technical School, 620 Pensacola Street, Honolulu, Hawaii 96825-8251, or call 568-8251.

Mrs. Elliott said, "We have had a great response to our nursing program, and we are very pleased to be able to offer this opportunity to those who are interested in pursuing a career in nursing. We look forward to welcoming our first class of students in March, and we are confident that they will succeed in their studies."

Hawaii has always been an interesting and picturesque chain of Mid-Pacific islands. A century ago ships landed and embarked with sugar and sisal. Today, the chain of islands, which constitute our 50th state, has a more diversified economy. The sugar and pineapple industries are losing their dominance as key income producers to a fast growing money trade, military spending and the international market.

Flying to Hawaii for a vacation is a rewarding experience. It is impossible to describe adequately in writing, the abundance of beauty of the people and their natural surroundings, exquisite and sophisticated. However, a remaining view of the early morning sunrise over Diamond Head, the genuine rhythm of the drums and feet, and the long established habit of informal group dancing.

Aloha from Hawaii.

Yolanda Morris, the student about whom this story is written.

'Miracle Year' Begins for Yolanda Morris, Practical Nurse

By Mary Harvey

Yolanda Morris, 18, lives in Honolulu, but her father was born in Japan and her mother in Hawaii. She is a 1964 graduate of Earl of the Sea high school in Honolulu, and a RN in Oriental Clipping, Welsh, French, Arabic, Italian and Latin, and in her spare time she is a professional hula dancer and a member of the Actors' Guild.

So begins many a story, but Yolanda's story is different. Her last chosen as her vocation was to read.

"You can't be a full dancer at your age," explained Yolanda, "because the young ones take your place. I'm really not a circus occupation. I have always wanted to be a nurse.

She began her "miracle year" at a course in practical nursing at the Technical School in Honolulu.

First she was interviewed by Mrs. Martha Wayland, R.N., administrator of the hospital, and practical training program. Following this, she was tested for the required knowledge and intelligence. This was held over a period of two weeks. Tests were given in English, French, Italian, and Spanish, and included questions on general science, philosophy, arithmetic, history, and government.

Yolanda Morris was accepted as a member of practical nursing, and arrangements were made for her training at Kaiser Foundation Hospital. What Yolanda needed to do was to earn the practical nurse license and future graduation kept her "miracle year" in mind.

Licensed practical nurses are prepared to give direct patient care under the supervision of registered nurses or physicians.

Within a few weeks after acceptance Technical School, Department of Practical Nursing, Honolulu, and a group of students, accompanied by their R.N. seniors, were taken to Kaiser Foundation Hospital, one of the first hospitals used by the school for its junior students. This included six weeks of practical training, and four weeks with skilled students, four weeks of practical nursing and eight weeks of practical nursing. Upon completion of these requirements, she will graduate from the Technical School and will be qualified to take the required State Licensing examinations which will entitle her to work as a licensed practical nurse.

Written applications for practical nursing program admission to the one-year practical nursing program are accepted by the Department of Education, 620 Panama Street, Honolulu. Application must be in by September 1st. The school will begin in early September.

The school offers a course in practical nursing, and students are accepted on a basis of their ability to read and understand simple scientific material. The ability to write simply and clearly is essential.

SERVICE WITH A SMILE—Student practical nurse Yolanda Morris takes the blood pressure of patient Morris H. Harboldt at Kaiser Foundation Hospital.

1966
I was under the impression that you were suffering from a very bad case of seasickness, but I am glad to learn that you are feeling better.

Dr. Duskin was followed by a panel of young nurses from the University of Hawaii. The topics discussed included nursing on the ward, the importance of seeking early treatment for depression, and the need for nurses to be aware of the signs of suicide.

The panelists also spoke about the challenges of being a nurse in a wartime environment. They emphasized the importance of taking care of oneself, both physically and mentally, and of seeking support when needed.

To conclude the session, Dr. Duskin thanked the panelists and the audience for their participation and commitment to the nursing profession. She reminded everyone of the vital role nurses play in providing care and support to patients and families.

In closing, Dr. Duskin encouraged everyone to continue to pursue their passion for nursing and to never forget the impact that each nurse has on the lives of those they care for.
From Cashier to Practical Nurse

'Miracle Year' Program Changes Her Life

A story published in the Sunday Star-Bulletin & Advertiser, "Nursing School Admission Changes Her Life," by Bob Evans, highlighted the transformation of Mrs. Mary Carmack. From a cashier to a licensed practical nurse, she made a significant shift in her career.

Mrs. Carmack, 34, of Honolulu, Hawaii, was an admitted applicant to the Kapiolani Technical School for practical nursing, one of five students selected from a group of 200 applicants.

"I always wanted to be a nurse, and the short and inexpensive training program for practical nurses at Kapiolani Technical School provided the answer," she said.

Mrs. Carmack was interviewed by Mrs. Jeanie Elliott, R.N., coordinator at Kapiolani Technical School, who praised Mrs. Carmack's suitability for nursing. Mrs. Carmack had been a nurse for her family of four boys, 11, 10, 8 and 5.

Educational requirements for admission to practical nursing programs include completion of high school, passing a competency test, and meeting health standards.

In cases of financial need, scholarships are available to selected applicants. For more information, call 49 or 568-825. Entrance exams will be held at the school.

In August, Mrs. Carmack will be graduated from Kaiser Foundation Hospital, one of five hospitals in Hawaii. Change in the practical nursing program includes the daily care of patients; charting of patients' records; the administration of medications; and the ability to read and carry out instructions for daily activities.

In September, Mrs. Carmack, along with some of the lovely new uniforms, will be modeled at 'Girls Who Wear Fabrics.'Enough to make the uniforms look wonderful, Mrs. Carmack explained, "I volunteered to supervise my neighbors Mr. and Mrs. Stanley Shin, who have four children, too! My neighbors understand that mother was going back to school to become a nurse, and they were very kind to support me.

At our first stop in the new uniforms, Mrs. Carmack was greeted by Mrs. LH, who explained, "I wore fabrics. Enough to make the uniforms look wonderful, Mrs. Carmack explained, "I volunteered to supervise my neighbors Mr. and Mrs. Stanley Shin, who have four children, too! My neighbors understand that mother was going back to school to become a nurse, and they were very kind to support me.

The 'miracle year' program includes weekly study of children at the Laura Morgan Kindergarten. The program includes body structure and function, diseases, and the care of patients; charting of patients' records; and the ability to read and carry out instructions for daily activities.

In cases of financial need, scholarships are available to selected applicants through the Manpower Development and Training Act. For more information, call 49 or 568-825. Entrance exams will be held at the school.

Twenty-four Practical Nursing students from Kapiolani Community College began their Medical-Surgical affiliation on September 27. Clinical instructors are Mrs. Eleuteria Yanai and Mrs. June Morishia. Students are assigned to Waikiki-Ewa I and II. These students are the first to initiate their new dacron turquoise uniforms. They will be with us for a period of 24 weeks, then rotate through clinical areas in other institutions.

Kuakini welcomes them most heartily for Practical Nurses are an important occupational group in nursing. They are prepared, through a one-year course of vocational education to practice the art of nursing within a limited range of types of situations.

The students are: Editha Blanco, Carolyn Hayworth, Hannelore Jackson, Rahab Kalili, Yoshie Kubota, Patricia Lacuesta, Sandra Mitsunaga, Aileen Nishimura, Evelyn Patrie, Louise Sakurai, Audrey Sylva, Karen Wright, Martha Akamine, Pearl Soper, Mary Fabella, Aurora Grossale, Margareta Haywood, Kemamo Hookano, Diana Kawaauhau, Harriet Osumi, Alberta Pea, Donna Lee Prasas, Laurie Suganuma, and Marion Yates.

First Year Students Receive Their Caps

At capping ceremonies held in the practical nursing library yesterday afternoon, 29 freshmen students received their white caps with aqua bands.

Presiding over was Instructor Mrs. Hanayo Hashimoto.

Witnessed by members of their families, the freshmen students became juniors as they received their caps. This marks the first step toward becoming practical nurses.

"These students have proved to themselves, their instructors, and the hospital personnel that they are capable of doing more difficult hospital work and patient care," said Department Chairman Mrs. Marjorie Elliott.

CAPPING practical nursing student, Aileen Nishimura, is instructor Mrs. Hanayo Hashimoto. The cap is white with an aqua band.

Nursing Course
One such course soon available is women who want to go back to work in the practical nursing program at Kapiolani Community College.

The same time of the students will be married women and others who wish to get back to work, and Mrs. Mayreld Elliott, R.N., coordinator of the program.
Students frequently find the course a source of satisfaction in the work. Mrs. Percy L. Jackson says her husband helped her build their two children while she studied.
"I love it. Before I started the course, I was a homemaker. Now, I don’t know where the days go," she said.
Another student found going back to school more difficult than she had expected.
"It’s a lot of work - not like doing housework, which seems everlasting," said Mrs. Willie Haywood.
"You have to see patients, you have to write papers," she said.
"It’s inspiring work — not like doing housework, which seems everlasting," said Mrs. Willie Haywood.
Among students, Mrs. Thomas O. Omoi, says the strongest to saddened her studies in with writing stories and reading for her three children and working with children. Mrs. Maximo Blanca, says her aim was to continue as a career interrupted by marriage. "I always wanted to be a nurse, and I was a student at the University of Hawaii, but only when we had a son.

Miss Maximo Blanca, says her aim was to continue as a career interrupted by marriage. "I always wanted to be a nurse, and I was a student at the University of Hawaii, but only when we had a son.

"Now that the baby is 11 months old, my husband agreed to let me take the course now in practical nursing, because he believes in taking care of Marsha.

How About You
These are a few tales of those who want to find new challenges in going back to work. It may give you something to think about when you’re torn between a career and a homemaker.

Nursing Trainees
Don New Uniforms

New uniforms will be worn by nursing students at Kapiolani Community College when classes begin on Sept. 6.

Women will be attired in a button-down short-sleeved dress in aqua blue. The new uniforms are made of drip-dry dacron.

Mrs. Margaret Elliott, R.N., chairman of the Practical Nursing Department, noted that two new styles of uniforms were tried on an experimental basis by women students last year.

The other uniform was a leisure-timed shirt dress. The new uniform will replace the green cotton uniform worn with starched collars and cuffs which have been worn in the past.

Women will continue to wear white coats and style "Son Casey" jackets with the college insignia, "Practical Nurse, K.C.C., Hawaii."

Mrs. Elliott has announced the retirement of Mrs. Argentina Friedly, R.N., who will assume her duties and become chairman of the Practical Nursing Department.

The program in practical nursing consists of two semesters of classroom and a six-week summer session.

There are openings for 60 qualified women and men, single or married, between the ages of 18 and 50. High school graduates are preferred, but applicants may be made for applicants over 25 years of age.

Tests will be given to suitable applicants on Thursday of the second week of the school term.

Tuition, which includes nursing theory classes at the Kapiolani Community College campus and supervised clinical experience in patient care in selected health agencies, is estimated at $160.

Cost of the program including uniforms, tuition, books and graduation expenses is an estimated $160. Students are responsible for their own living and transportation expenses.

Licensed practical nurses work under the supervision of professional nurses or physicians in hospitals, nursing homes, care homes, doctors' offices and doctors' homes.

Further information and application forms may be obtained from the college, telephone 52-349 or 568-825.
