

UH System Health and Safety Offices/Programs

Program	Responsibility	Website
Environmental Health and Safety Office	Promotes safe campus environments through the development and administration of health and safety programs critical to the university experience.	http://www.hawaii.edu/ehso/
Occupational Health and Safety	Responsible for the identification, evaluation and control of workplace hazards such as asbestos, chemical exposure, indoor air quality, excessive noise, ergonomics and other potentially hazardous conditions	http://www.hawaii.edu/ehso/industrial/
Biological Safety Program	Promote safe biosafety practices for all staff, students and researchers. Minimize the risk of potential occupational exposure to biological materials in research and teaching environments and to prevent the release of such materials into the environment.	http://manoa.hawaii.edu/ovcrge/research/biosafety_program/index.html
Lab Safety Program	Oversees emergency safety showers, eyewash equipment, and lab ventilation. Employee exposure to chemical and physical hazards in campus laboratories is identified, evaluated, and controlled.	http://www.hawaii.edu/ehso/lab/
Hazardous Materials Management Program	Responsible for the transportation, segregation, consolidation, and storage of potentially hazardous materials and chemicals in compliance with EPA regulations.	http://www.hawaii.edu/ehso/hazmat/
