Study Abroad – Freeman

Kapi'olani Community College (KCC) is proud to offer University of Hawai'i students the opportunity to grow in personal development and academic excellence through

immersion into foreign cultures throughout the world.

Students experience not only the host culture and language itself but also alternative values and communicative styles, fostering a deeper understanding of societies outside the USA. Furthermore, students who participate in the study abroad program develop new relationships, grow in responsibility and character, and above all cultivate a reflective appreciation of personal identity.

All costs, duration of stay, requirements, and credits offered may vary depending upon the individual study abroad program.
