**Updates and Announcements**

Links may open in a new window; you may need to close that window to return to this page. [QuickTime Player](#) is needed to view the video.

- Spring 2012 courses are currently published (visible to students). Note that instructors can also manually [publish and unpublish](#) courses. Additionally Fall 2011 are unpublished by default. (01/03/12)
- Missing a course? If you do not see your course listed in the blue tab bar, check if it is listed under the 201230 or 201233 term under the "My Active Sites" tab. **Note** that instructors can also manually [publish and unpublish](#) courses, and that you can also check which course spaces you are associated with (including unpublished courses) in the My Tools tab at [MyUH](#). If it is not there, please fill out a "[Request Assistance](#)" form and provide detailed information about the course you are looking for. During very busy registration times courses may take a while to show up in your account, (01/03/12)
- Need to copy content from one site to another? Instructors/maintainers who want to copy content from one site to another can use the "[Import from Site](#)" function to do this.
- Update your UH password! As part of a practice to ensure a safe computing environment for our University of Hawai'i community, ITS is recommending that users change their UH password at least once a year. This process will allow you to update your password to our latest password requirements as well as "encrypt" your password with our latest up to date process. Click the links for [more information](#) and to [update your password](#). (09/21/11)
- Internet Explorer (IE) users: We recommend using [Firefox](#) with Laulima. If you use Internet Explorer 8 and above, you must use it in
