Initiatives

SSC supports implementation of various initiatives aligned with the UHCC Strategic Directions to increase student success. The SSC will help organize the seven community colleges around common action using a single framework -UHCC Student Success Pathway.

All UHCC student success initiatives support the Pathway framework. Math and English Redesign, Multiple measures for placement, Exploratory majors, STAR GPS and Integrated Student Support (ISS) help create intentional and structured experiences that help students navigate from Connection, Entry, Progress & Learning, to Completion to Transfer or Career.

Math & English

Evaluation and redesign of math and English curriculum, delivery, and pedagogy to support students' program and career needs. Redesign includes an evaluation of assessment instruments and policies to decrease developmental referrals, reduce or eliminate the amount of time students spend in developmental education, and align developmental education across campuses and with college level courses.

STAR GPS

Newest feature of STAR degree audit platform that helps students register for courses in the optimal academic pathway based on their stated major. STAR GPS provides a personalized graduation pathway for students and helps to promote effective and efficient course scheduling and timely graduation and transfer.
