Visualize an occupation

consider a STEM career

across all industry sectors

Source: Economic Modeling Specialists Intl. (EMSI)

Demand: Based on the number of new and replacement jobs requiring some college level education.

Projected 2017 -to- 2027

Earnings: Based on one year average salary (2017).

Analyze

- Education pathways to high demand jobs
- Transfers (beta)

Compare (NEW)

Compare earnings between states and find out which jobs pay more in Hawai'i

50

Applications in Development

- How much education do I really need?
- Education attainment by sector
- Mapping zip code level data
- Student Portal

One of the University's initiatives is to engage with industry partners to develop industry-led curriculum that will imbue graduating students with the marketable skills for which businesses are looking. To further this initiative, we are developing online tools that looks not only at occupational data within individual sectors, but at data across all sectors, thus creating a holistic snapshot of industry demands and the current spread of occupations.

Development will focus on a user-friendly interface to access data-rich content, allowing readers to parse endless sources of statistics in a myriad of different equations, accessing answers for a vast range of unique and specific questions regarding academics, programming, careers, job availability and trends.
