RE: Resolutions 05052014-7: Recommendation to select an Assessment Management system for the campus

On May 5, 2014, following a motion, a second, and an open dialogue among the Senators, the Faculty Senate officially passed a resolution to recommend that KCC should immediately begin the process of selecting an assessment management system (AMS), preferably a software package designed specifically for this purpose, with configuration and support services provided by the software supplier. The deadline to select, configure, and implement the software should be no later than August 2016. An initial partial implementation would be preferable in the fall 2015.
